

Tesco now supplies degradable plastic carrier bags

Tesco 100% Degradable Plastic Carrier Bags incorporating EPI's TDPA® additive are strong bags, first used to carry your groceries home, then they can be reused as bin liners.

This bag can even be recycled prior to the onset of degradation.

Disposed of in a landfill it will degrade in the presence of oxygen, heat and stress within 12 to 24 months.

Even...if inadvertently littered, it will degrade in the presence of sunlight, heat and wind and ultimately biodegrade in the presence of oxygen, soil, moisture and microbes as described in ASTM D6954-04.
