Pioneering Oxo-biodegradable Plastic Technology

EPI Environmental Products Inc. Signs Two New Distribution Partners Expanding Presence in Southeast Asia

N.E.T. Eco Co. Ltd. (Thailand) and Sidkor Industrial Sales (Philippines) Join EPI's Growing Network of International Distributors

Vancouver, BC — April 14, 2010 — EPI, the global leader and pioneer of oxo-biodegradable plastics additives, today announced that two new independent distributors have selected EPI's totally degradable plastics additives (TDPA™) platform to promote the use of degradable and biodegradable plastics in their territories. With the addition of these new distributors in Southeast Asia, EPI's local presence continues to grow, adding to the brand's regional prominence.

“EPI is a customer service company, not just an environmentally-focused technology company. This makes a big difference as it enables our customers to produce the best oxo-biodegradable products with the support of EPI's internal team of scientists, and our local support networks around the globe. With the addition of N.E.T. in Thailand and Sidkor in Philippines, our customers and end users in these markets will receive seamless service in their own language and without time delays”, says Arthur Liu, Director of Sales and Marketing at EPI.

These distributors join EPI's ever- expanding network of agents and distributors around the globe. “We are always looking for great companies to represent us in underserved areas”, says Amir Fasihi, who manages EPI's Middle East operations.

About EPI

EPI, with headquarters in Vancouver, Canada, developed proprietary technology which enables the manufacture of environmentally responsible plastics that degrade after use. EPI's Totally Degradable Plastic Additives (TDPA™) are incorporated in commodity plastics on standard manufacturing machines to make plastic film and other single use plastic products degradable, without affecting the quality of the product itself. With a primary focus on waste management and single use plastic products, EPI aims to meet its customers' requirements through excellence in innovation, responsiveness and global capability.
