Pioneering Oxo-biodegradable Plastic Technology

Agents and Distributors Needed

in Algeria, Brazil, Cambodia, Dominican Republic, Egypt, India, Jordan, Kenya, Lebanon, Malaysia, Mexico, Morocco, Nigeria, Poland, Portugal, South Africa, Spain

Agents and Distributors Needed For Oxo-biodegradable plastic additives (TDPA™) that are to be incorporated into finished plastic products (polyethylene (PE), polypropylene (PP) and polystyrene (PS)) to render plastics degradable and ultimately biodegradable.

EPI Environmental Technologies Inc. – Founded in 1991, EPI pioneered Oxo-biodegradable plastic technology. EPI develops, manufactures, distributes and sells Totally Degradable Plastics Additives or “TDPA™”.

TDPA™ has been adopted for use in over 60 countries. Some of the world’s largest, most trusted and best-known retailers have used TDPA™, including TESCO, Migros and Exito, the largest supermarkets in the UK, Turkey, and Colombia, respectively. When plastic manufacturers adopt EPI’s TDPA™ technology, the end plastic products will become degradable and eventually biodegradable when disposed of in landfill or soil. EPI’s Oxo-biodegradable technology can be safely added in the manufacturing of product applications such as plastic bags, shrink, cling and stretch films, containers, food service packaging, personal care products and agriculture films.

We are seeking agents and distributors for the following international markets:

- Algeria
- Brazil
- Cambodia
- Dominican Republic
- Egypt
- India
- Jordan
- Kenya
- Lebanon
- Malaysia
- Mexico
- Morocco
- Nigeria
- South Africa
- Spain
- Portugal
- Poland

Qualifications: You have previous sales and distribution experience preferably within plastic manufacturing companies, familiar with technical details and excellent contact relationships within related industries, end users (supermarkets, retailers) and sustainability interest groups. You will have local presence and distributorship, form your sales and marketing team, and coordinate work with corporate office in Vancouver.
