EPI Environmental Technologies Inc. Continues Global Reach Uruguay Added to EPI's Distribution

Vancouver, Canada – December 20, 2010 -- EPI Environmental Technologies Inc. ("EPI"), the global leader of oxo-biodegradable plastic additives, has signed a sub-distributorship agreement with Saxonn S.A. for the distribution of TDPA™ Totally Degradable Plastic Additives™ in Uruguay.

"The trend we're noticing is that larger companies are aware of biodegradable technology however, there seems to be a lot of misinformation in the market regarding the options available to make plastic biodegradable," says Ms. Leticia Frigerio, Sales and Marketing Manager for Saxonn S.A. "Undoubtedly this provides us with a great opportunity to educate and help local businesses," states Ms. Frigerio.

"There is favorable government support in our country and there will soon be a law implemented for all carrier shopping bags to be oxo-biodegradable in the foreseeable future," concludes Leticia Frigerio.

Saxonn S.A. specializes in selling color and additive masterbatches for plastic and other chemical raw materials.

About EPI

Established in 1991 in Vancouver, Canada, EPI Environmental Technologies Inc. ("EPI") has become a world leader in the fight against plastic waste. EPI licenses proprietary technology that causes plastic to degrade. Plastic bags, plastic film, plastic packaging and other single-use plastics can remain in the environment for decades. When these products are manufactured using EPI's additives, they will degrade and subsequently biodegrade when discarded in soil, in the presence of microorganisms, moisture, and oxygen.
